

Boost Existing Benefits with Genomic Life

Genomic Life supports a comprehensive healthcare strategy by helping employees identify and get ahead of risks hidden in their DNA with proven interventions.

That can help improve health outcomes and may reduce the total cost of care.

→ The invisible risk in every workforce

About **1 in 5 people** have an increased risk of serious illness due to their DNA,¹ yet healthcare rarely takes that into account. As a result, employers have **invisible risks** that can lead to **high-cost claims**.

→ Identify & lower the risk

Genomic Life works by identifying future high-cost claimants and helping them take action today.

- Many of the most serious health conditions are influenced by DNA.
- With access to **DNA screenings** and **1-on-1 follow-up**, Genomic Life helps employees identify their unique risks and then work with their doctors to help lower those risks, before a medical crisis strikes.
- For employees who develop cancer (or another condition influenced by DNA), Genomic Life offers 1-on-1 guidance, **helping drive better outcomes and more efficient use of the healthcare system.**

→ Improve health & reduce the total cost of care

Genomic Life's ongoing, 1-on-1 guidance can turn DNA findings into action, and action into better outcomes. That can unlock:

- Cost containment
*Help employees act on health risks **before they become high-cost claims***
- Proactive care for better outcomes
*Engage employees to **address serious risks before they become diagnoses***
- The right care and support
*Improve **treatment completion rates** with navigation support*

Find the risk. Build the pathway. Change the outcome.

"I thought I was healthy, but my DNA told another story. Fortunately some small steps were all it took to put me back on track."

—Scott
